

Scenario Setup

BEFORE THE FIRST CARD IS PLAYED

HATCHET

1 Setup Checklist

- 1 Read the intro** in the scenario book — and the **Special Rules box** *now*. It often changes setup: spawns, round counting, allies.
- 2 Set scenario level:** average party level $\div 2$, **rounded up**. Easy -1 · Normal $+0$ · Hard $+1$ · Very Hard $+2$.
- 3 ! Build the first map section ONLY.** Anything drawn in a later section — monsters included — is *not placed now*. It enters when that section is revealed.
- 4 Place monsters for YOUR player count** — only standees whose 2/3/4-player icon matches. Gold-ringed hex = elite. Slide each stat card to the **scenario level**.
- 5 Monster ability decks:** one shuffled deck per monster *type* in the scenario — including types arriving later.
- 6 ! Battle goals:** deal 2 to each player. Secretly keep 1, discard the other.
- 7 Attack modifier decks:** your 20 base cards + **your perk changes**, plus the monster deck. Strip out stale bless/curse. Shuffle all.
- 8 Elements board:** all six markers to **Inert**. Round tracker to 1 if the scenario counts rounds.
- 9 Characters:** HP dial to max · pick your hand *after* reading the scenario · items readied & unflipped.
- 10 Place figures** on the starting hexes — then draw the first cards.

3 Opening a Door

- Reveal the section; place overlays and its monsters — **your player count only**, again.
- New monster types **draw an ability card immediately**. They act *this round* at that initiative — if it already passed, they stand idle.
- Doors stay open. Revealed stays revealed.

4 Quick Numbers

SCEN. LVL	0	1	2	3	4	5	6	7
MONSTER LVL	0	1	2	3	4	5	6	7
TRAP DAMAGE	2	3	4	5	6	7	8	9

5 Traps We Fall Into

- Battle goal cards never dealt.
- Whole map populated at setup — monster flood.
- Perk cards missing from the modifier deck.
- Stat sleeves still on last scenario's level.
- Special-rules box discovered at round six.

2 Choosing Your Hand

- Hand picked **after** reading the scenario — tune for objective, room count and monster types.
- Long scenario? Ration **Lost** cards — each one burnt is a shorter fuse on exhaustion.
- Items may be swapped freely before the scenario, never during.

6 Oft Forgot

- You may forego any attack, push or pull — but a used push/pull goes to full effect.
- Summons don't act the round they arrive, and never drop loot.
- Your deck is your clock — burn Lost cards early, exhaust early.
